Installing the transmitter

3 Mount it

Remove the protective film from the Velcro on the back of the transmitter and mount it on the wall. Alternatively use the supplied screw and plug.

4 Turn it on

Pull the battery tab to start the transmitter. The indicators light up in green to show that it is on.

5 Connect it

Connect the USB cable to the power adapter. Then plug the adapter into a wall outlet. If you have a landline telephone, connect it to the telephone jack using the supplied splitter.
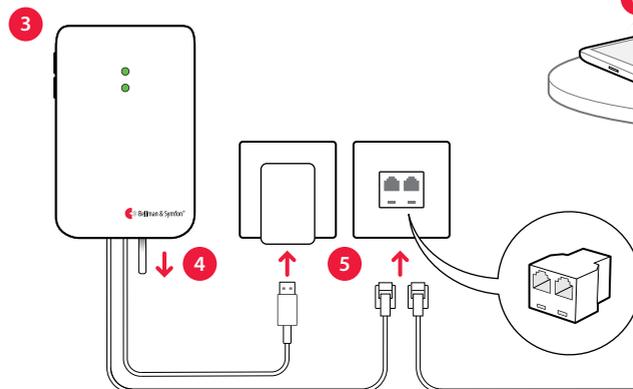

6 Test the mobile phone

Have someone call your mobile. The yellow LED on the Visit receiver blinks and it starts to flash, sound or vibrate (depending on the receiver).

7 Test the landline phone

Call your landline phone. The yellow LED on the Visit receiver lights up and it starts to flash, sound or vibrate (depending on the receiver).
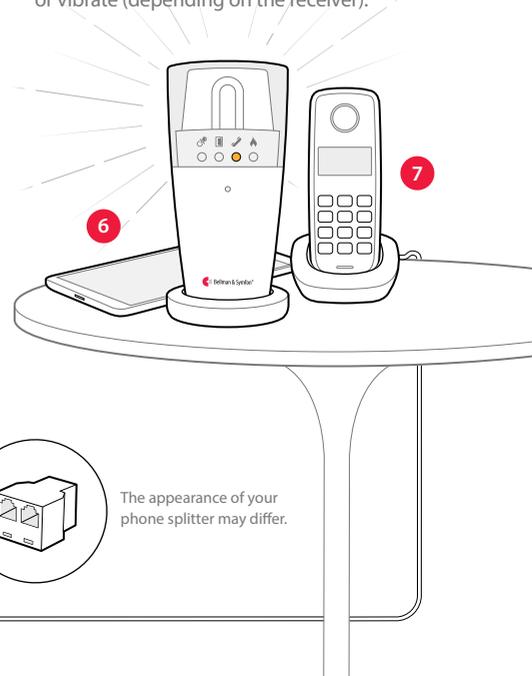

The appearance of your phone splitter may differ.

Using the app

There are times during the day when you probably don't want to be disturbed. The app features four preset **Activities** that gives you full control of your Visit alerts. Just tap an activity to select it.

Good morning
Visit alerts for both calls and messages during this activity. Select it during daytime, when you don't want to miss out on anything.

Good night
All Visit alerts are off during this activity. Select it when you go to bed, so you are not woken up by alerts during your sleep.

Movie night
Visit only alerts for calls during this activity. Select it when you are watching TV, so you're not distracted by a constant flow of messages.

Dinner time
Visit only alerts for messages during this activity. Select it at dinner, so you don't have to answer incoming calls in the middle of the main course.

For technical information, advanced settings and troubleshooting, go the app Help section.

9:41

Good morning
All Visit alerts are on during this activity.
